

ChemTracker

Remove the burden to efficiently managing chemical inventories with bulk edit and reconciliation tools to ensure accuracy. Ensure operational excellence and compliance with industry trusted complex regulatory reporting, **utilizing a curated database of chemical hazards and properties.**

// The time spent identifying hazard information shrank from several hours to less than 5 minutes."

– Lab Operations | The Engine Accelerator

Chemical Inventory Management

Eliminate storage chaos with container-level tracking in real-time.

- Organize chemical inventory management with accurate and trusted container level tracking in real-time.
- Get an organizational view of all chemicals onsite with the ability to easily filter, view, track, and locate high-hazard materials and chemicals individually or by lab group.
- Maintain cross-visibility with peer inventory and manage user permissions for secure search and find chemicals related to projects others are using.
- Seamlessly add chemicals to your inventory by taking a photo of the label

Chemical Compliance

Save hours of complex report pulling with data all in one place.

- Gain confidence with regulatory reporting dashboards that provide easy tracking, accurate data, and real-time updates.
- Reliable reports at the aggregate unit, including Tier II RTK, Fire Code compliance, and Maximum Allowable Quantities (MAQ's).
- Ensure safety and compliance with full transparency into chemical inventory, while providing one-click reporting insights to senior management.

Inventory Audit & Monitoring

Reduce waste and hazardous materials on-hand.

- Reconcile physical inventory with records to correct discrepancies, and monitor inventory levels so you always know how much is in stock, what's running out, expiration dates, and more.
- Promote chemical sharing that saves money on unnecessary ordering, while reducing waste and hazardous materials on-hand
- Eliminate the frustration of unlabeled containers with RFID or barcode tags and scanners for easy inventory management.
- Search and find Peroxide Formers based on specific parameters and get results for important details such as quantities set to expire.

SDS Management

Established chemical database of 2 million+ curated SDS's

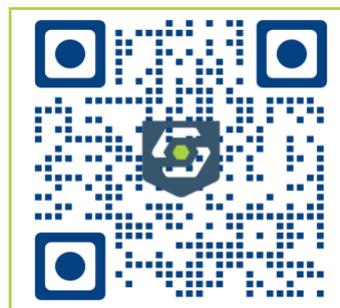

- Access to a proprietary, comprehensive library of safety data sheets including features like bulk edit and exporting.
- Easy search functionality by chemical name or CAS, and automatically assign SDS to any container.
- Automatically assign any SDS from the library to every container with SDS Auto-match means records are always accurate and current.

Maintain safe, efficient, and compliant labs with inventory management software you can trust.
