

Incident Management

Capture incident and near miss data from any device with a simple and accessible way to report and track from initial notification to close, allowing you to operate with confidence while **mitigating risk and driving operational excellence.**

Reduce over **80%** of time on common lab safety and operations tasks.

Reduce scientists time in compliance tasks by **60.5%**

Provide oversight and transparency of incidents

Holistic view helps identify patterns and aids in risk mitigation

- Gain instance access to the status of each open report and who is responsible for follow-up, with option to drill down into the details.
- Assign personnel to follow-up on specific reports.
- Works with your organization's existing incident report forms.

Proactive tracking to mitigate risks

Drive a safety compliance culture and productivity

- Track incidents from initial report to close out.
- Track and report incidents on the go from any device. Anyone can submit a report from anywhere – when it happens and where it happens.
- File and report minor incidents and near misses before they result in more severe consequences with an easy to fill out, standardized form.
- Alert the incident management team when a report is submitted with automated email notifications.
- Build rapport with your organization's scientists and other group members by using incident data to identify opportunities for training and/or process improvements to reduce risks.

Robust data collection and reporting

Enhance communications and protect your people and reputation.

- Identify root causes and preventative actions to reduce risk.
- Visualize your data with built-in charts that are created automatically. Full data exports available, including an API for integrating data with 3rd party applications.
- Accurately capture incident and near miss data with a simple, easy to use interface. Track the follow-up investigation for every report, including identifying root causes and corrective actions.
- A simplified log helps maintain compliance with OSHA (e.g., 300 form) regulations and eliminates extra documentation hassles.
- Reporting offers full view into aggregated data, giving confidence you know exactly what issues are arising and where.
- Easily attach documents and photos to incident reports for clear communication and accountability.
- Close the loop and document improvements by tracking the completion of corrective actions.

Maintain safe, efficient, and compliant labs by simplifying your incident reporting process and gaining robust tracking capabilities.

INCIDENT MANAGEMENT			
Simple initial report form	✓	Pre-built incident and near miss charts	✓
Near miss reporting	✓	CSV export of incident and near miss data	✓
Detailed investigation forms	✓	Photo and document attachments	✓
Root cause identification	✓	Track reportable categories of incidents	✓
Corrective action tracking	✓	BLS injury and illness codes	✓
OSHA 300 log data	✓	Email alerts to incident investigation team	✓
Mobile friendly	✓	Investigation status tracking and assignment	✓

Combining modules provides additional benefits to enhance your organizations EHS and Lab Ops goals of achieving safety, compliance, and operational excellence.

More time for research | Less administrative burden | Safety compliance with confidence

Contact us to learn more.

As a global leader in EHS and Lab Ops software, SciShield ensures a safe, efficient, and compliant laboratory environment. Founded, developed, and trusted by scientists, SciShield is committed to reducing administrative burden and complexity on scientists with extensible and rapidly deployed modular solutions – helping to *unleash innovation without compromise*.
