

# Training LMS

Reduce organizational risk by maintaining a compliant online and in-person training program. Build confidence by being able to proactively identify gaps and non-compliance issues, ensuring **your laboratory teams are current on the latest safety and hazard training.**

Using SciShield,  
**over 98%** of users  
are current on  
training requirements.

// *Compliance metrics have been beautiful with the ability to track metrics for monthly reporting, and check training during lab inspections by generating reports in minutes."*

– Larry M., Laboratory Safety Officer and Hazardous Waste Program Manager

## Dashboard Reporting

*Real-time dashboard reporting with actionable insights.*

- Manage a more efficient lab training program with comprehensive, real-time reporting with deeper insights.
- Get instant visibility into top-level summaries of training compliance. Identify overdue or outstanding required courses, and manage certifications.
- Establish a baseline to assess impact for general and specific lab training requirements and ensure teams meet compliance.

## Risk-based Training Requirements

*Have confidence your training program is compliant.*

- Easily identify and trigger required training associated to each person's job activities and organization-specific training rules.
- Ensure your teams are completing up-to-date required training and safety certifications.
- Reduce manual follow-up on delinquencies with automated communications and organizational risk for non-compliance.

## LMS Course Directory

*Deliver training faster with course content located in one place.*

- Simplify the management of training courses for your generated content, including PDFs, PowerPoint, mp4, SCORM, and other LMS integrations.
- Manage an effective training program by connecting requirements, communication, and reporting in one centralized repository.
- For academic institutions, deliver online student safety training to thousands at a time in an efficient manner.

## 3<sup>rd</sup> Party Integrations

*Flexibility to meet your customized needs with pre-built LMS integrations.*

- Reach your training and compliance goals by connecting with solutions you already use today.
- Leverage eLearning software that makes connections to our software seamless, including SCORM.
- Maintain permission-based access to labs and spaces with easy to integrate Keycard access.

## Maintain compliant online and in-person training programs.
